EMERGENCY VEHICLE UPFITTING

Vehicle Specific Consoles

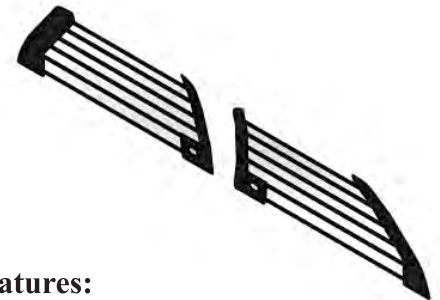

Features:

- Low profile, no-drill vehicle specific console box
- Six fasteners for mounting right to transmission hump, does not require a leg kit or MCS top plate
- A removable top plate and center brace for easy radio installation and wire routing
- Four 12-Volt knockouts (located on passenger side)
- USB and MP3 knockouts for aftermarket module:
- Computer can be mounted on top of the console box and has the ability to be off-set towards the passenger on the "smiley face pattern" or mounted to the driver side with the 3-bolt hole pattern
- Heavy gauge steel, fully welded construction for long-term durability

Features:

- Opening and closing latch allows officers to quickly access their weapons when the situation calls for it
- Dual channel system allows full adjustability of lock heads and butt plates
- Sliding mounting brackets provide great adaptability to horizontal or vertical installations
- Adjustable brackets for flush or offset mounting
- Fully adaptable, providing versatility of installation to partitions, SUV hatches and/or sedan trunks
- Coated butt plate for gun stocks protection
- Includes one (1) gun lock able to fit most rifles and shotguns
- Black powdercoat and anodized finish for maximum corrosion resistance

Features:

- ½ inch steel bars
- Fully welded construction
- Black powder coat finish for long-term durability
- LED mounting locations on lower front corners
- Comes as a pair for both driver and passenger side

Features:

- Double hinge points to allow better access to get spare tire out of the storage area
- Brackets to hold front of tray in place with threaded PEM Studs and a 4-Wing Turn Knob
- Two foldaway legs to support tray when raised up, with magnets to secure end in stowed positions
- Cable tie holes on the tray to secure wiring to avoid pinch points
- Black powder coat finish for maximum corrosion resistance
- Hardware provided for mounting plate

EMERGENCY VEHICLE UPFITTING

FRONT PARTITION

Prisoner Transport Systems- Our Front Partition was perfectly designed with both the officer and the upfitter in mind.

- **Durability-** Officers need to know their partition system is durable enough to keep them safe in any situation. With that we have engineered our partition to be more durable! To prove how strong our partition is we ran it through rigorous testing.
- **Weight Reduction-** Half the weight! Our front partitions were specifically designed to be half the weight of traditional partition systems. Traditional Partitions just slow the vehicle down, PTS partitions are lighter making the vehicle faster and providing savings on fuel. We also care about the upfitter, our lightweight system makes install faster and easier.
- **Space-** We know that officers come in all shapes in sizes so we designed our front partition to allow the officer's seat to move in a full range of motion.

OS-BELT System

OS-BELT

Prisoner Transport Systems OS-BELT™ System (Officer Safety Belt System) was designed to allow the Officer to buckle a prisoner in the vehicle without having to reach across them.

- Never reach across a prisoner again!
- Designed for officer safety
- 70% more likely for officers to buckle prisoners
- Storage tongue stores the buckle on the front partition

With the OS-BELT™ system the risk of an Officer being injured by an unruly prisoner is greatly reduced. The system is made so that the buckle and tongue for the belt retractor system are on the door side of the vehicle rather than in the center of the vehicle. Where an officer would have to reach across a prisoner putting himself at risk of being hit by the prisoner.

FLOOR PAN

Prisoner Transport Systems Floor Pans are the perfect complement to our seat systems.

- Increase the life of the vehicle
- Easy clean up
- A perfect fit every time

Using our own proprietary polymer blend, it's able to handle extreme conditions. **Prisoner Transport Systems** floor pans use the V-Drain system, ensuring easy clean. The easy installation, perfect fit and obvious other advantages quickly made this product very popular.

Window Guards

Prisoner Transport Systems window guards, and door caps are the perfect answer for guaranteeing prisoner safety and security.

- Easy installation
- Secures prisoner, and protects vehicle
- Pairs perfectly with Prisoner Transport Systems Door Caps

EMERGENCY VEHICLE UPFITTING

Partitions

multiple configurations available

Setina's "XL" Xtra Legroom

Setina's line of Patented Side Curtain Airbag Compatible Partitions. Based on our popular Space-Saver, "RP" recessed Panel design with Xtra Legroom. Our Suspended Mounting System anchors to vehicle's B-Pillars, eliminating partition floor mounting brackets with no foot obstructions in vehicle foot well area.

Maximum Clearance for Entry & Exit

Unique Open Countoured Design provides officer with the easiest prisoner loading and unloading. Recessed storage panel between front seats provides extra space for consoles, mounting vertical gun locks and other accessories and gear.

SETINA

MANUFACTURING

Push Bumpers

multiple configurations available

Vehicle Specific Consoles

Havis vehicle specific consoles seamlessly mount into your vehicle for a custom look and feel. They attach directly to the OEM console for easy installation.

Every aspect of our push bumpers has undergone careful consideration and thoughtful design so that we can build the best solutions for law enforcement. Setina heavy duty push bumpers and fender protectors are designed for quick, easy installation and use automaker and OEM approved primer and exterior finish for maximum durability, and are airbag compatible as well.

Heavy-Duty Slide Out Trunk Mounts

With the right trunk mount, you can optimize storage space and provide a clean, safe and secure mounting surface for expensive radio and communications equipment. Havis' full width trunk trays are constructed of welded steel for added strength and support.
